Police Engine Idle

This feature allows you to leave the engine running and prevents your vehicle from unauthorized use when outside of your vehicle. Allows the key to be removed from ignition while vehicle remains idling.

**Switching the System On:**
- With your vehicle running and the transmission in park (P), press the button on the instrument panel. A warning lamp illuminates to confirm the system is on.
- Switch the ignition off and remove the key.

**When the system is on:**
- The power windows are disabled and the windows remain in their current state.
- The power door locks are disabled and all doors remain in their current locking state.
  
  *Note: The doors can be unlocked with the key blade*
- The liftgate or luggage compartment does not open but can be opened with the key.

**To Switch the System Off:**
The system can be switched “off” by doing any of the following:
- Inserting the key and switching the ignition to the run position.
- Pressing the button on the instrument panel.

  *Note: If you switch the system off before switching the ignition to the run position, your vehicle shuts down*
Front Interior Windshield Warning Lights

Take on a stealth appearance with this low profile Front Interior Windshield Warning Lights

- The interior visor light is a super low-profile warning light bar fully integrated into the top of the windshield.
- New interior visor light to provide a covert feature for agency patrol vehicles.
- Dark shade band at the top of the windshield is replaced by clear glass when the visor light is ordered, providing superior color visibility and brightness.
- The interior visor light comes with a limited warranty and maintains the spacious interior feel that many agencies love about the latest generation of Ford Police Interceptors.
- When activated, the interior visor light flashes bright, alternating red and blue bars on the top of the windshield and can be programmed for red/red or blue/blue operation.
- The visor light also features bright white “take down” and “scene” capabilities, which give excellent forward visibility, and can be set up to meet California Title 13 regulations.
- The visor light can also be programmed from full intensity down to 20% as needs dictate.

Option Code: (96W)

NOTE: Police Interceptor Utility Only
