Get Seamless, Secure Access to Vehicle Data Through Our Open, Cloud-Based Platform.

Our open platform provides easy access to clean, secure, manufacturer-grade vehicle data that's engineered to work with the tools and people you know and trust. This applies whether you need vehicle data integrated with your proprietary software or accessible through your existing partner network.

Why Ford Data Services?

Our Systems Are Ford Engineered: Integrated and Open with Our Know-How and Reliability

Helps you and your partners manage the flow of data in a secure and robust way, allowing your business operations to run seamlessly

Manufacturer-Grade Signal Accuracy and Access: Always Evolving

Gives you access to the newest updates and vehicle signals as soon as they become available – delivering insights as quickly as your business needs them

Integrated Modem Technology

Enables us to engineer the vehicle, the data signals and the modem in tandem to maximize the depth and breadth of data we can use to develop new solutions for you

Security Management

Our expertise and robust security program provide our customers with industry-leading data protection

Easy API Integration for Third Parties

Gives developers secure and easy access to our APIs in order to leverage processed vehicle data

Partner Integration Is Seamless

Connecting with our open access approach makes data integration with your existing partnerships seamless and easy – helping you use third-party services you need for your business

Our platform is designed for secure, open integration with any third-party service tool. We are working to expand our network. Contact us with questions

About Ford Commercial Solutions

Ford Commercial Solutions provides focused and relevant telematics and data tools that fleets need to optimize, adapt and become more operationally effective.

We blend Ford technical expertise with a hands-on understanding of real-world challenges to give our customers a partner they can depend on.

We deliver purpose-built solutions for different kinds of fleets, helping them optimize resources so they can commit more time and attention to their operational priorities. Our telematics solutions are built on an integrated, open platform designed to evolve as our customers do, flexing to meet their ever-changing needs.
