

FORD COMMERCIAL SOLUTIONS

FORD PLUG-IN MODEM KIT

Powerful, Data-Driven Solutions for Your Fleet

Now, Ford Commercial Vehicles as far back as 2015* – or earlier depending on vehicle line – can seamlessly deliver similar valuable cloud-based telematics and data services as newer Ford Motor Company vehicles.

Ford Plug-In Modem Kit Makes it Possible for More Ford Vehicles to Join the Cloud

Now, Ford Commercial Vehicles back to Model Year 2015 (depending on vehicle line*) can benefit from the cloud-based uptime and productivity tools that you've come to rely on to manage your business.

Each Ford Plug-In Modem Kit comes complete with a Y-cable splitter to ensure access to the vehicle's OBD-II port.

Tested and Validated on Ford Vehicles, for Ford Vehicles

The Ford Plug-In Modem Kit is engineered to process data from your Ford vehicle so there's no reverse engineering or interpretations.

Vehicle Data You Can Use

The Ford Plug-In Modem Kit provides connectivity, and combined with available Ford Telematics™ offers features such as actual odometer readings and manufacturer signals.

Installs Easily Without Blocking the OBD-II Port

The Ford Plug-In Modem Kit is a compact retrofit that quickly installs out of sight behind the vehicle's dashboard to help reduce tampering and integrates directly with the vehicle's electronic architecture. A Y-cable splitter provides access to the vehicle's OBD-II port.

Verify Ford Plug-In Modem Kit Compatibility
