QVM Bulletin: Q-228

Date: 12 March, 2015

Transit Aux Fuel Port Kits

Models Affected: All Transit vehicles requiring auxiliary fuel port access for ancillary equipment.

Gasoline Aux Fuel Port kit:

Gasoline Transit vehicle will require a 90° fitting in order to access the aux fuel port. This is contained in the Gas Auxiliary port kit.

Gas Auxiliary port kit part number: CK4Z-9B210-A

Diesel Aux Fuel Port kit:

Diesel Transit vehicle will require a 90° fitting and an auxiliary fuel pick up straw in order to access the aux fuel Port. Both are contained in the Diesel Auxiliary port kit.

Diesel Auxiliary port kit part number: CK4Z-9B210-B

Both of these kits are available through Ford Service. For installation information for both kits, refer the Fuel System section of the Transit Body and Equipment Mounting Manual (BEMM).

Note: These kit part numbers supersede those listed in the 08/2014 version of the BEMM.

If you have any questions, please contact the Ford Truck Body Builders Advisory Service as shown in the header of this bulletin.
